

Coastline Curriculum Map (Summer Term)

Computing

In computing we will be learning about effective searching including...

- how to search safely on the internet.
- using and finding safe websites.
- understanding and using the correct terminology about searching.

At the end of the unit we will be making leaflets on purple mash.

Geography

The main focus of our unit is Geography this term. We will be learning about geographical processes such as erosion, about how to use and draw a map and all about features of seaside towns. We will get to visit the beach as part of this topic and as part of our whole school enrichment!

Music

In music this term we are going to be exploring using improvisation both with singing and with instruments. We will use up to 3 musical notes to add to existing songs and thinking about which notes fit in well with the song.

Art

In art this term we will be looking closely at flowers. We will be using clay, printing and drawing to recreate flowers in a variety of ways. We will take note of the lines, colours and shapes that make the flowers when studying them in detail.

DT

For DT this term we will be making our own beach huts! We will design them first, and then learn about tool safety and practice woodworking before creating our final products!

Science

Our final science unit of the year will be all about plants. We will be working on our enquiry and observation skills to learn about what plants need to grow, how they grow, and about what they need to survive.
